Nathan Brett has devoted the past 23 years of his working life to uncomplicating the world of Property Management. Each year, more and more Property Management Businesses and brands want to hear his story.

#### Some Ancient History includes

- Owner of a multi-award winning, highly profitable Agency that succeeded in strategically growing a Rent Roll business from 230 properties to 1010 properties in a decade
- A keen business student with degrees in Business Management, Human Resource Management and an ever-increasing library of books and resources
- A passion for applying successful business models to Property Management to support efficiency, customer delight and maximise business profits
- An active business advisor on multiple chapters and committees
- A portfolio Landlord of 16 years

#### Some Modern History includes

- A Director of Real Estate Dynamics
- A highly 'in demand' Trainer who has trained many thousands of Business Owners, Property Managers, Leasing Consultants and Business Development Managers in high performance Property Management across Australia
- A highly specialised Business Coach who has assisted in developing a coaching team who has worked with over 426 Business Owners and Property Management Team Members over 1460 hours of coaching across the country.

Nathan Brett has a fundamental belief that Property Management often becomes overcomplicated. He also sees in his work that many of the systems and service delivery techniques exist using old tools and old rules (tools and rules that were taught decades ago) and, quite simply, they don't work!

What Nathan and his team teach does work across the country and he can prove it.

If you want to be enthused, impressed, inspired and challenged – you can't go past Nathan Brett and his team!
